

Quality Improvement: Where to Begin?

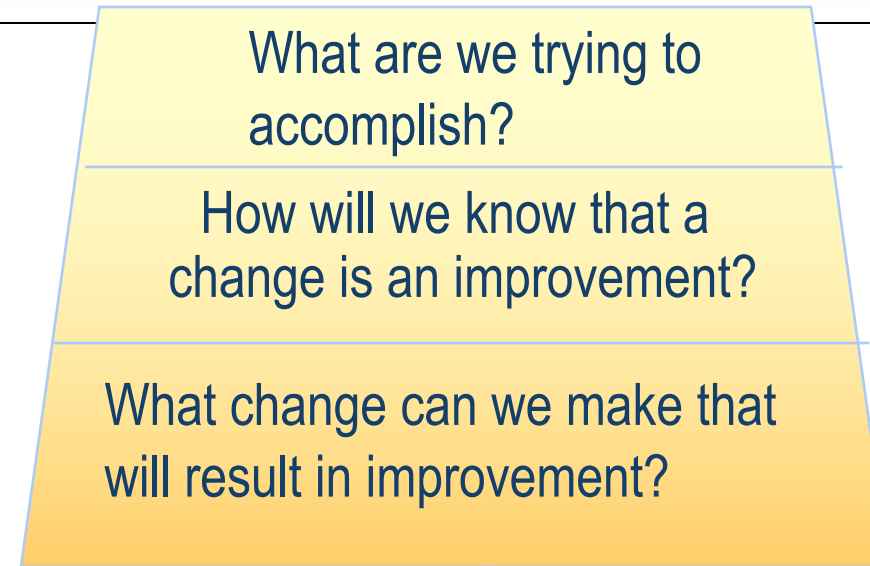

Marilyn Hockenberry PhD, RN-CS, PNP, FAAN
Professor of Pediatrics
Baylor College of Medicine

Director, Global HOPE Nursing

Objectives

- Present the Quality Improvement- Plan, Do, Study Act Cycle (PDSA)
- Explore how to decide what change is needed
- Review how to use a Fish Diagram for exploring a clinical issue that needs change.

Model for Improvement

Model for Improvement

PLAN

1. Form a team
 - Invite the right people
2. Establish specific aims
 - What you want to accomplish
3. Decide what changes to make
 - Be creative and innovative
4. Explore measures
 - Use quantitative measures to determine if change leads to improvement

Deming Cycle; Shewhart Cycle

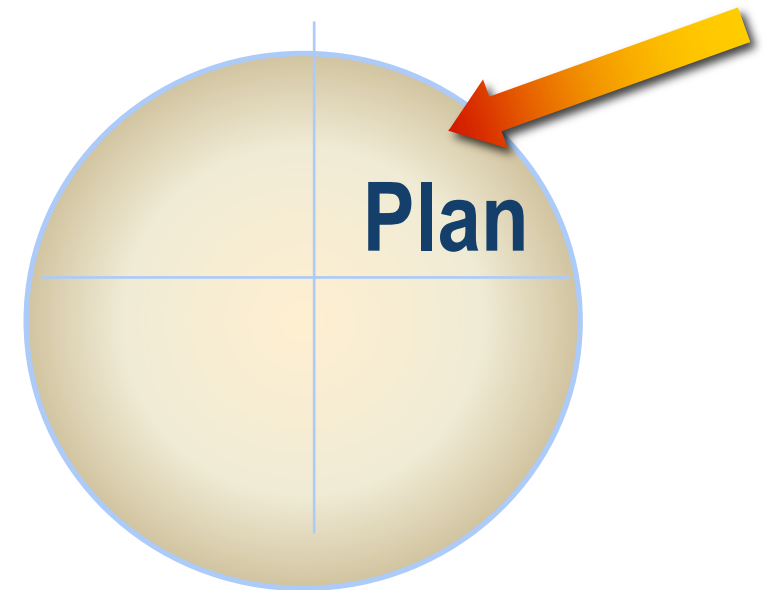

Model for Improvement

Spend time deciding what
CHANGE needs to be made.....

Talk with you team

Change Concept Examples

- Eliminate Waste
- Improve work flow
- Change work environment
- Decrease variation
- Manage time
- Error proofing
- Customer Service

Deming Cycle; Shewhart Cycle

Decide what Change is Needed

Process Mapping

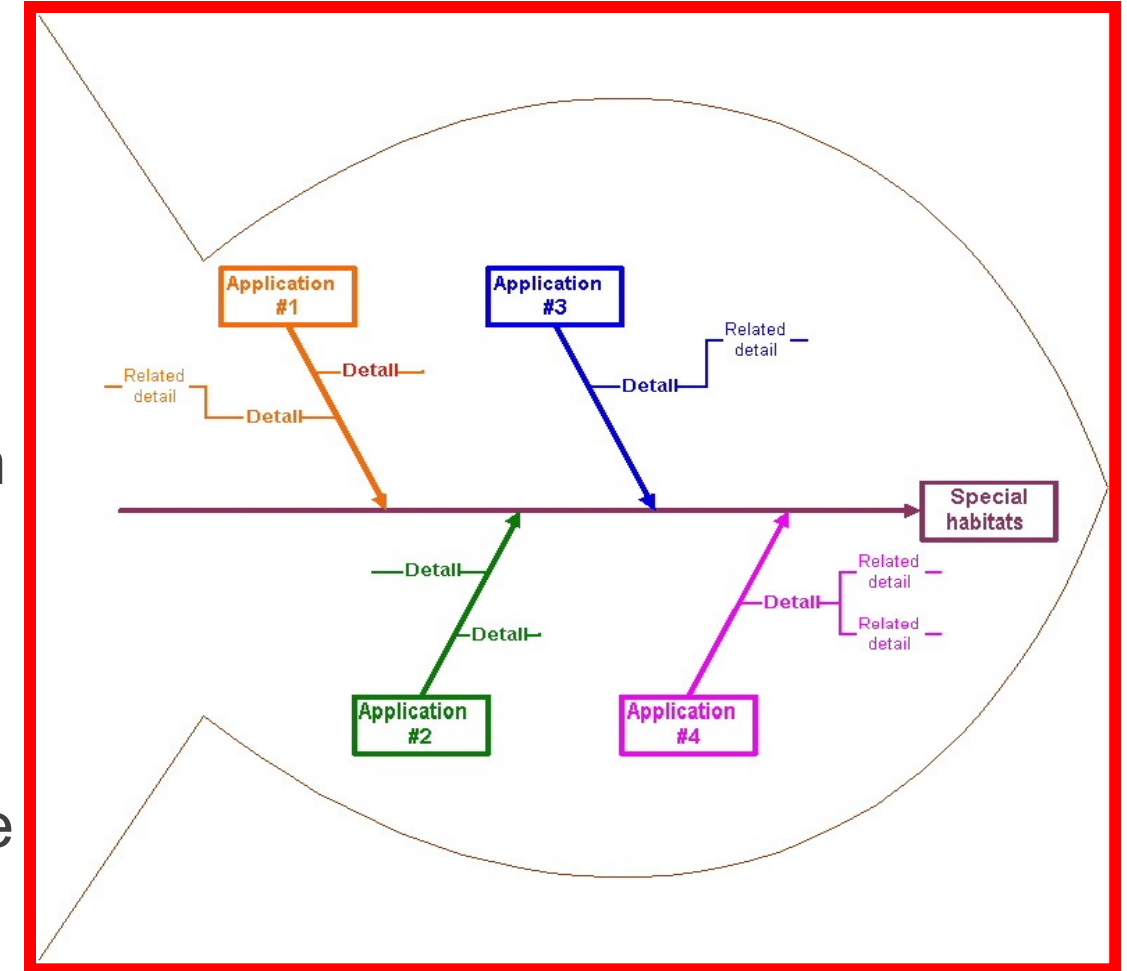

- ▶ Puts a spotlight on the problem
- ▶ Streamlines work processes
- ▶ Defines and standardizes the steps and sequence
- ▶ Promotes deep understanding
- ▶ Builds consensus

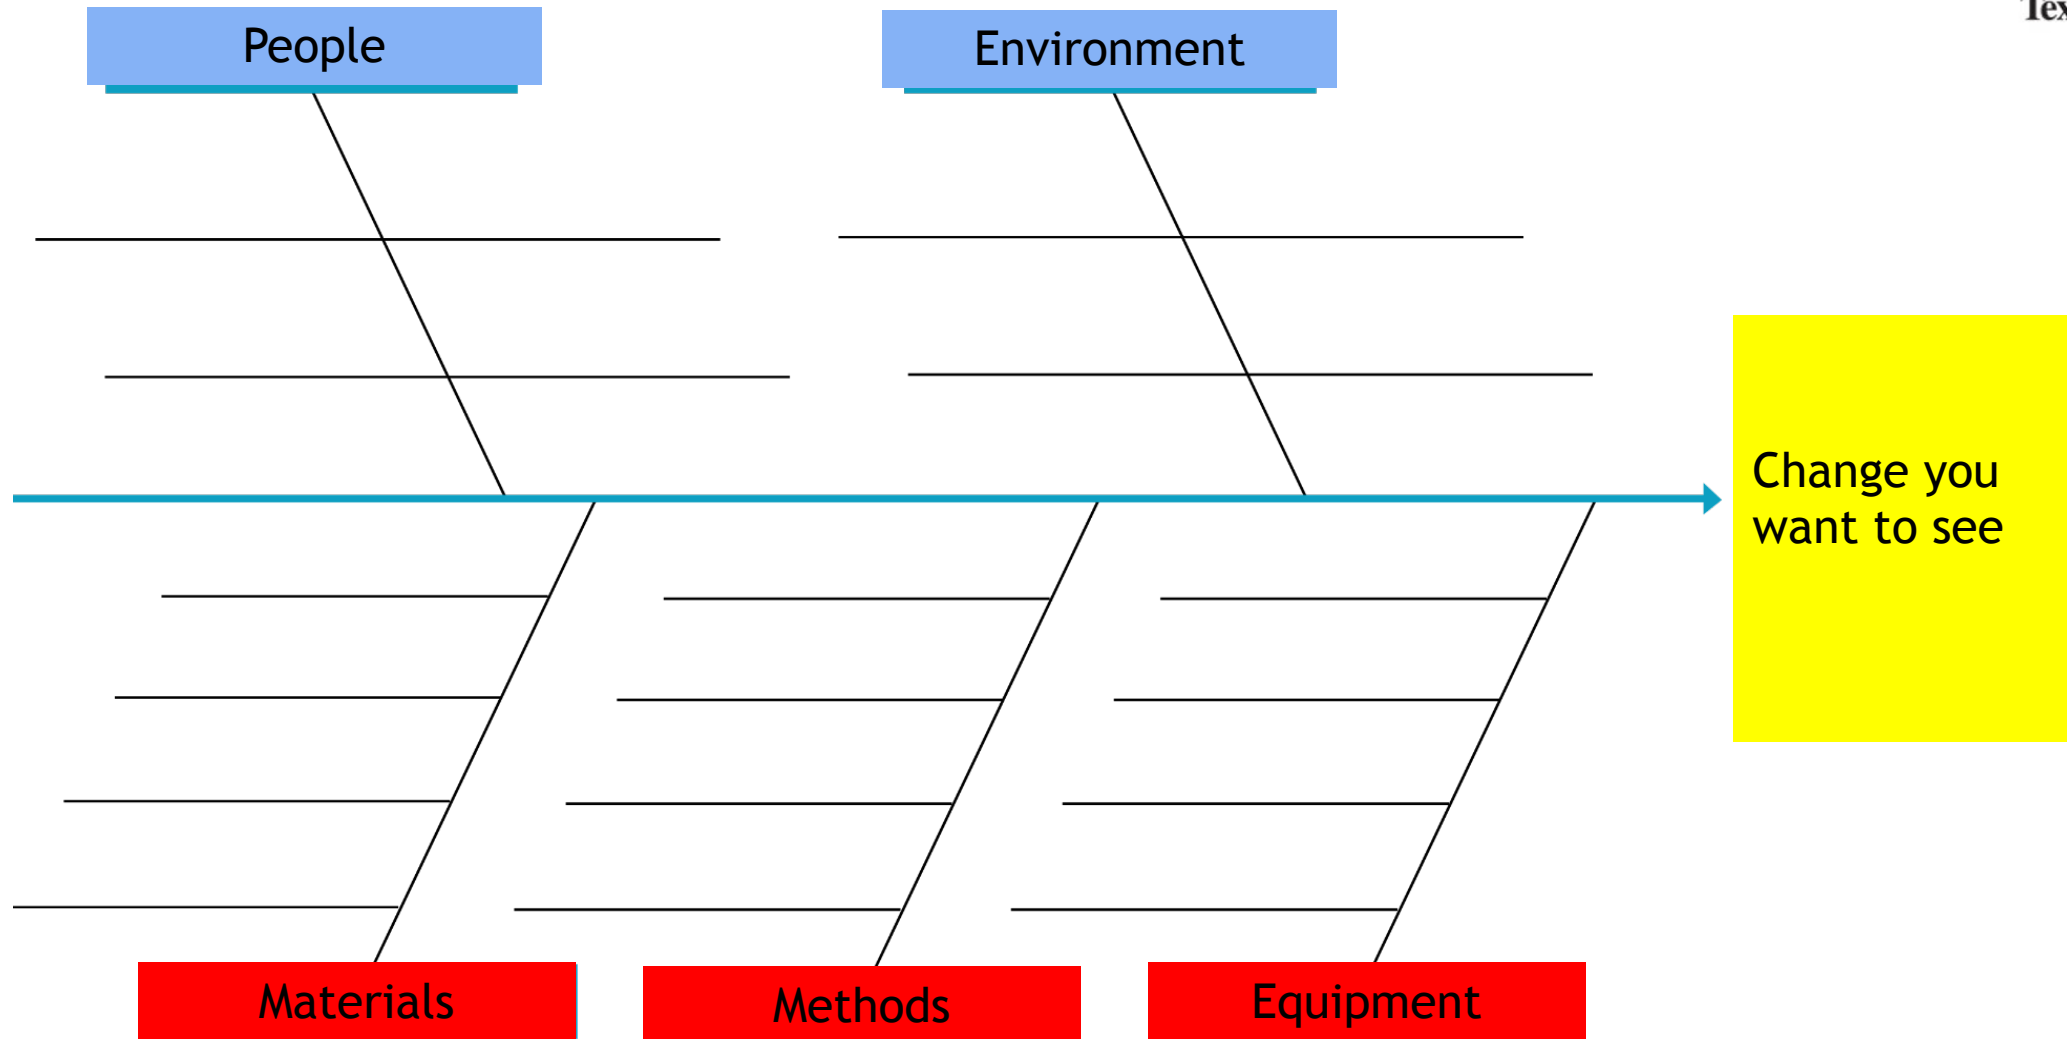

Decide what Change is Needed

Fishbone Diagrams

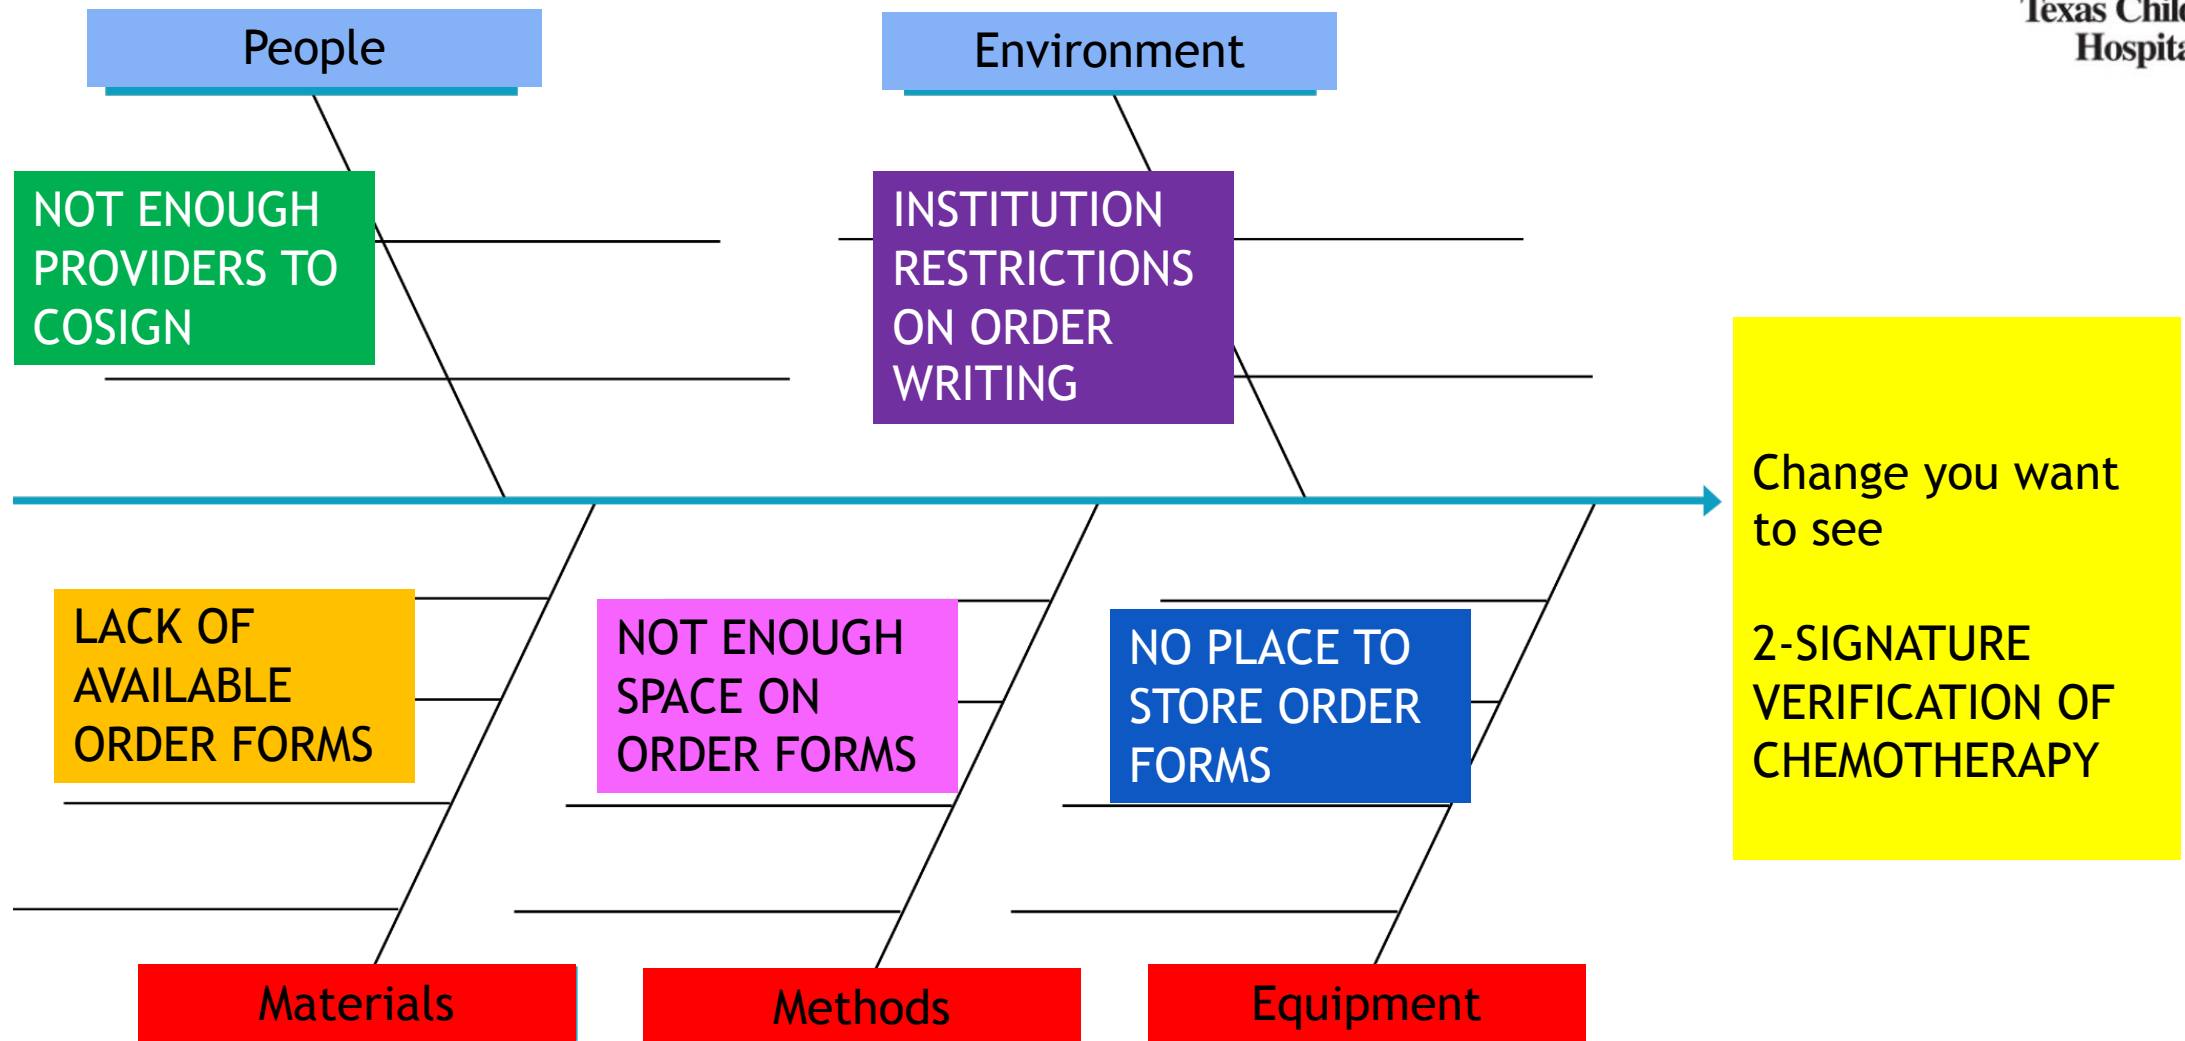

- ▶ Straightforward and easy to learn visual tool.
- ▶ Involves the team in problem resolution.
- ▶ Organizes discussion to stay focused on the current issues.
- ▶ Promotes "System Thinking" through visual linkages.
- ▶ Prioritizes further analysis and corrective actions.

Decide what Change is Needed

Stakeholder Input

QT teams typically benefit from:

- Identifying as many stake holders and sponsors as possible
- Use strategies and tips for gathering stakeholder feedback and reaction

QT teams must ensure they get the right levels of input from the right people who have influence and power related to the effort.

QI Essentials Toolkit

- [Cause and Effect Diagram](#)
- [Driver Diagram](#)
- [Failure Modes and Effects Analysis \(FMEA\)](#)
- [Flowchart](#)
- [Histogram](#)
- [Pareto Chart](#)
- [PDSA Worksheet](#)
- [Project Planning Form](#)
- [Run Chart & Control Chart](#)
- [Scatter Diagram](#)

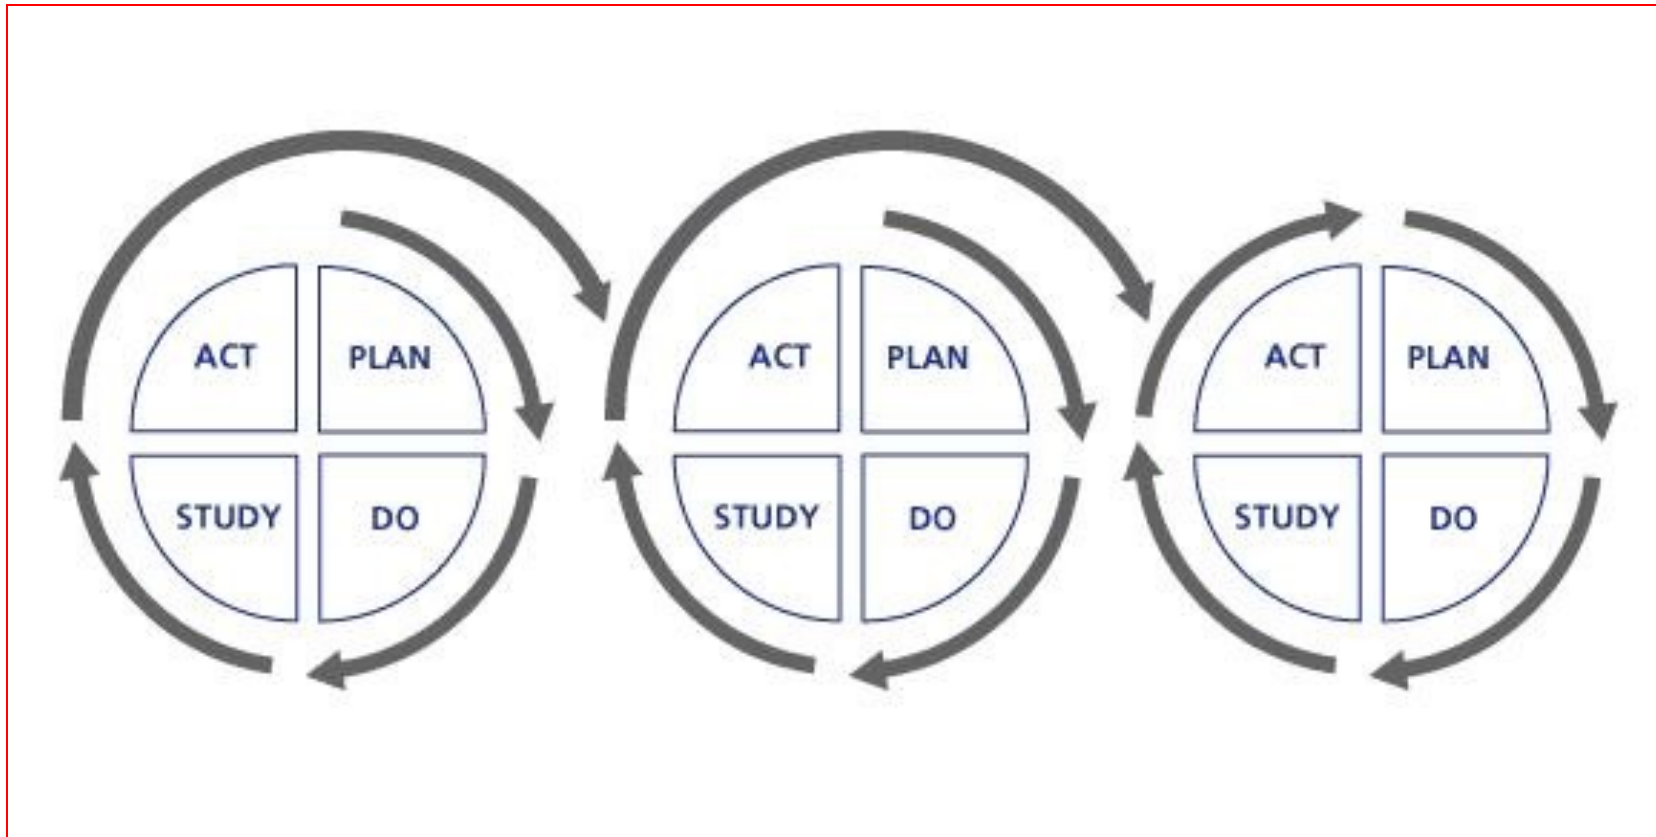

IHI's QI Essentials Toolkit includes the tools and templates you need to launch and manage a successful improvement project. Each of the nine tools in the toolkit includes a short description, instructions, an example, and a blank template.

IHI Quality Improvement Essentials Toolkit

Assignments

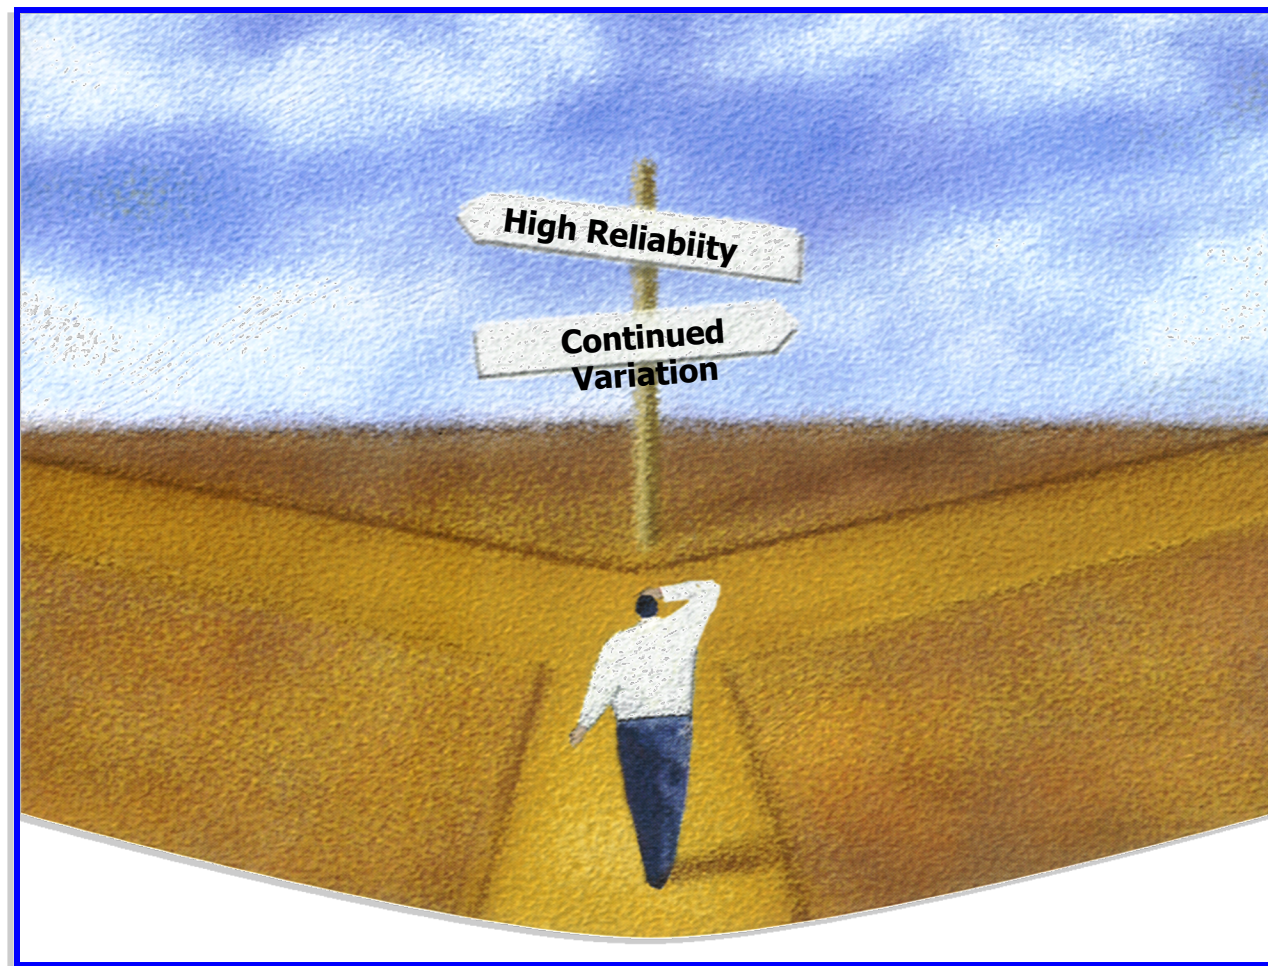

- Complete a Fishbone Diagram of the Issue/s the Project will address
- Establish list of stakeholders that should be involved
